

Atkinson Re-Elected President Coleman Miners Association

Pit Committee of International Mine Elected by Acclamation. Election for Hospital Committee, and Secretary

At the regular meeting of the association held in the Community hall on Sunday, J. Atkinson was elected by acclamation for the ensuing year as president. This is his second term. For secretary, W. Chapman, present secretary, and Max Stegler were nominated. International pit committee re-elected by acclamation were J. Hadley, W. Hayson, Harold Chamberlain, Ernest Hill.

McGillivray pit committee nominations were J. Atkinson, sr., W. Chapman, J. Griffiths, M. Stegler, R. Parry, G. Ford. Four to be elected.

McGillivray hospital board nominees were G. Griffiths, G. Ford, W. Williams, W. Martland, J. Atkinson, jr., G. Burchell.

International hospital board nominees were G. Duffield, sr., D. Holly, E. Hill, W. Nelson, J. Glendinning.

Many Requests for Copies

The photograph of the 1913 foot ball team published in last week's Journal created widespread interest throughout the Pass and many requests were received for copies. The old days and old players are well remembered by quite a large number of Pass residents.

Tom Uphill, M.E.A., Fernie, was elected president of the Dominion Day sports committee. \$600 will be raised to put over a day's sports in Fernie.

Blairmore Wins From Coleman at Baseball

Playing under a threatening sky the Coleman Red Sox took a trimming at the hands of the Blairmore nine on Monday evening, being on the short end of a 9-4 score.

Play was even up to the fifth inning when the score stood 2-2. Yagos for Coleman had pitched a good game up to this point but developed a sore arm and Atkinson went in as relief pitcher. Atkinson pitched good ball for two innings but Blairmore finally got on to his style of pitching and from then on he was hit rather freely. Coleman's fielding was not up to par and this caused several runs to be scored that should never have been.

Blairmore ran riot to score seven runs in the last three innings while Coleman could only reply with two, Blairmore making doubly sure of winning by sending in Herman in the ninth to relieve Houbreggs who was beginning to tire.

Line up

Coleman: Yagos, Richards, Atkinson, Rypian, Pattinson, Kubica Fraser, Gate, Kapalka, Hayson Blairmore: Houbreggs, Van Duren, Vangotinoen, Herman, Kemp, Vejprava, Johnson, Martini Chala.

Umpire: Destobel

Town Council Meeting

The town council met on Tuesday evening with Mayor Pattinson, Councillors Serak, Chapman, Harry and Hayson present.

Minutes of previous regular and special meetings were approved.

A young man named Monecy applied for permission to build a cottage at the lake. Action deferred till council consulted with Blairmore.

Application of B.C. Cafe for renewal of licence was heard.

The Motordrome asked permission to erect a sign in the vicinity of their garage, which was referred to the Works and Property committee.

The Italian Society asked for a sidewalk to be laid on the avenue on the west side of their building. The council agreed to furnish the material if the Society would provide the labor.

The roof of the town hall will be repaired as it is leaking badly. The flagpole will be placed on the tower, as walking on the roof to fix the flag causes damage and leakages.

It was ordered the funerals of indigents shall not exceed a cost of \$75.

A number of miscellaneous accounts were ordered paid.

The local Boy Scouts will hold their annual flag day on June 30.

Coleman Almost Won Football Game

Michel Scored in Last Minute to Tie Score 2-2

Playing in poor form Coleman was only able to hold Michel to a 2-2 tie on Saturday on the local grounds. Coleman played a fairly good game in the first half and had a slight edge on play but fell away badly in the second, Michel taking advantage of this to score two goals.

Michel opened the game by making a raid on Coleman goal but were forced to shoot wide. The teams gradually settled down to their game and both goalies were called upon to save some good shots. The Michel defence were miskicking because of heavy pressure and the Michel goalie had to save repeatedly to save his goal. The first goal of the game came when Jack Anderson received a pass and banged a beauty into the Michel goal just barely out of reach of the goalkeeper. Coleman continued to have a slight edge on play although Michel several times brought pressure to bear on the Coleman goal.

The first half ended 1-0 for Coleman. After the change over Coleman's play became ragged and Michel took this opportunity to make things hot for the Coleman defence. A Michel forward finally broke through but was brought down heavily by Griffiths, the referee ruling a penalty. The spot kick was taken by Walker whose shot hit the goalpost and rebounded into play, Coleman conceding a corner to relieve pressure. Michel continued to hold the upper hand and finally Gaskell sent the ball into the net with a nice drive. With the score tied Coleman put more pep into their play and gave the Michel defence a few anxious moments. After thirty minutes in the second half a Michel player handled the ball in his penalty area. J. Anderson took the penalty and in an effort to get power behind his drive missed the goal entirely. Play ding-donged back and forth till ten minutes from time when Fraser scored for Coleman during a scramble in front of the Michel goal. Coleman immediately went on the defensive and Michel was successful in forcing a corner three minutes

later. Owen took the corner kick and sent out a beauty for Gaskell to head it through to tie the game. With the score deadlocked once again the teams tried desperately to score but to no avail. Final result Coleman 2 Michel 2.

Line up Coleman: Ford, Griffiths, Burrell, Gardiner, J. Anderson, Park, Balloch, Fraser, Bartruis, Jack Anderson, Brown.

Michel: Martin, Travis, Wentcott, McFarlane, Haddock, P. Gaskell, Lyne, G. Gaskell, Walker, Menzie, Owen.

REACH EVERY HOME IN COLEMAN THROUGH THE JOURNAL

Meeting for Sports Day July 2nd.

All business men are requested to attend a meeting on Friday evening in the council chamber at 8 p.m. for the purpose of organizing committees for Dominion Day celebration. This is the only day of the year when Coleman puts on a general celebration for the mine workers and families, and it should be given the support of every merchant and business man.

Members of last year's committee are requested to attend.—H. T. Halliwell, president, Coleman Board of Trade

Douglas Social Credit

System Meeting

A local committee interested in disseminating information on the Douglas system has arranged a public meeting in the Community hall, on Tuesday next, at 8 p.m. Mr. and Mrs. W. W. Rogers and Mr. Unwin of Calgary will give addresses on this subject which has excited wide interest in many countries, and on which the originator, Maj. Douglas, was invited to address the Alberta legislature at the recent session.

The addresses will be interspersed with musical selections, and Mayor Pattinson has been invited to act as chairman. A collection will be taken to defray expenses of the speakers, and the public of the Pass towns are cordially invited.

ANNOUNCEMENT

The Ladies Auxiliary of St. Paul's United church are holding a Strawberry tea and Party table in the clubroom on Saturday, June 16, from 3 to 6 p.m. Everyone welcomed.

Oxford Group Meeting at Lethbridge Attracted People From Pass

A party from Coleman attended the meetings at Lethbridge over Sunday, and on Tuesday six cars of Blairmore people went to the meetings. All speak highly of the inspiration derived and feel that they have benefited from their contact with the Group.

Mr. Marjoribanks of Edinburgh was the principal speaker at Lethbridge, he having been at the house party at Banff, and who is considered one of the outstanding members of Dr. Buchman's Group.

From Banff the party goes to Winnipeg and eastern cities, to sail for England later in the month.

Bulova Watch Competition

S. W. Chahley announces that time for entries for the handsome gold watches has been extended till June 20. 25c is the entry fee, and on 8 day clock will be started and sealed in the presence of a committee, and the names at which the minute hand stops on the enlarged dial in the store window will be the winners. Call at the store. (adv.)

CARD OF THANKS

I wish to express my sincere thanks and appreciation to all who so kindly comforted me in my recent sad bereavement. To the council and citizens of Coleman, Father Dunbar, Mrs. Borden and McLean, the nurses of Coleman hospital, Miss Wilson and pupils of Grade VII, and to all who sent flowers and loaned cars. I shall feel everlastingly grateful. Though words fail to express my gratitude their kindness will not soon be forgotten.—Mrs. Paul Baker.

Sentinel Motors shipped in three handsome new Pontiac Eighties this week.

H. T. HALLIWELL, President

Quick Relief Now From Neuralgia

JACK, IN TO SEE CLARK ABOUT THAT BIG ORDER IN 40 MINUTES AND I HAVE TERRIFIC HEADACHE. WHAT CAN I DO?

DON'T WORRY. GET SOME ASPIRIN. TWO TABLETS WILL STOP THAT PAIN IN A FEW MINUTES.

LATER, JACK, I GOT THE ORDER! YES, FELT BETTER. I GOT THE ORDER! YES, FELT BETTER. I GOT THE ORDER! YES, FELT BETTER.

Real Aspirin Starts Taking Hold in Few Minutes

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia... the fastest safe relief, it is said, yet discovered.

Those results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, and integrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly by you swallow it. And this is ready to go to work almost instantly.

When you buy, though, be on guard against substitution. Be sure you get ASPIRIN's quick relief, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.

Does Not Harm the Heart

Gold Still Is King

The lure of gold continues to exercise its sway upon the minds of men. Countries may go off the gold standard. New economists may argue, as they will, against gold as a monetary basis. Despite all the argument "about it and about," the yellow metal still casts its potent spell, alluring men to brave hardship and danger in its quest, impelling men to undertake hazardous expeditions to win it, inducing countries to exert desperate efforts to acquire it. Mirage or otherwise, it glids the horizon of new prophet and old priest, of poet and peasant, of rich and poor, of commoner and peer. Phantasm or reality, gold still is King.

These somewhat without platitudes are evoked by the recent appearance in a financial journal, of two items on gold which, strangely enough, were placed in close proximity. The one was headed: "Nations still scrambling for gold," and the other "£30,000,000 Buried by Pirates Sought." The one article demonstrates the hold which the gold tradition has upon world statesmen; the other epitomizes the ingenuity and risk employed and undertaken in efforts to win the precious metal—a gamble with life and money.

Relative to the international scramble, it is stated that, Britain and other non-gold-standard countries, including the United States, of course, are buying gold wherever it can be bought, and that their accumulations of gold now break all previous records.

Replying to the question why the United States continues to purchase gold, the New York Times recently replied that, in principle at least, gold still remains the world's monetary standard. Continuing it said:

"No government is shap[ing] its monetary policies in line with the dreams of the imaginative 'New School Economists.' Every government is recognizing the paramount necessity of return to a stabilized basis of international valuation. Nothing has shown this underlying sentiment more clearly than the fact that every nation—even those which have suspended gold payments—is guarding the gold reserve against the central bank note issues as scrupulously as it did half a dozen years ago. Whereas the Bank of England, at the beginning of 1933, held the smallest gold reserve in more than a dozen years, it has subsequently added nearly \$350,000,000, bringing the reserve to the highest figure in its history." The general process is indirect recognition of the gold standard. The possession of adequate and concentrated gold reserves would unquestionably be of high value whenever return of sound international conditions should make return to sound and stable currencies a possibility."

The other story is somewhat similar to the famous Cross Island treasure hunt. It refers to a projected expedition from Britain to Tahiti in the south Pacific, to reclaim approximately \$30,000,000 in gold ingots and a fortune in jewels, said to have been buried by pirates in or about 1849. Usually such treasure hunts originate with discovery, in some peculiar manner, of a map of the cache. Such a map Stevenson introduced in his "Treasure Island"; such a map as allegedly may have been found tattooed on the chest of some sailor in some Barbary Coast "dive." In this particular instance, the map came into possession of an Australian in 1900, who, it is said, visited the island and succeeded in removing some of the jewels. These, he subsequently buried—a peculiar enough action for which no reason is given. However, in March 6, 1934, the same gentleman claims to have located the treasure at the exact point indicated by the map. Speaking of the discovery, he says:

"There are only two things to contend with in drilling for the loot—sand and coral. The drill went down through the sand, ground its way through the rough coral and rested on the gold. There is no rock off Tahiti and by the drills, we felt out the shape of the ingots and also are able to determine the extent of the treasure. The drills spin on gold just as a top would on a marble floor."

It is upon such evidence and such representations, apparently, that hard-headed British engineers and business men are prepared to risk their money, and expend their enterprise.

Flotsam And Jetsam

Goods lost at sea and found floating are called flotsam and jetsam. Flotsam is overboard or jettisoned, and jetsam, or washed up from a wreck, are called jetsam.

They do not belong to the finder, even if he cannot trace the owner. They must be handed over to the Crown, and part of their value is paid in compensation.

More Than Satisfied

He had bought a barometer, and a fortnight later the instrument maker from whom he bought it passed the door.

"Well, are you satisfied with the barometer?" asked the instrument maker.

"Rather," said the owner. "I have had it a fortnight, and we have had fine weather all the time."

The Great Zambesi Bridge

Remarkable Feat Of Engineering In Heart Of Rhodesia

Spanning the Zambesi Gorge stands one of the highest bridges in the world.

This bridge is in the heart of Rhodesia, far from civilization and so near to the great Victoria Falls that crossing the bridge are sometimes held up by spray from the turbulent water. The building of the Zambesi Bridge was a marvellous feat of engineering. First of all a rocket had to be fired across the rocky chasm. The rocket was attached to a cable. In turn was fastened to a length of wire and a steel rope.

During the construction of the bridge the builders worked at a dizzy height over the swirling waters below.

When workmen began their task a large net was spread beneath them to prevent catastrophe, should any of them lose their balance.

But instead of steadying their nerves they complained that the net served only as a constant reminder of their perilous position, and so it had to be removed. After a period of little more than six months the bridge was completed and a train travelling at fifteen miles an hour was driven across to test its strength. The structure was painted grey so that whenever the material rusted in any part the defect would immediately be noticed. This impressive feat of engineering in the wilds in no way detracts from the beauty of the scenery.

Harbor Expert Dead

Sir Frederick Palmer, Who Recommended Churchill Be Noted Engineer

News reached Canada recently of the death at Lingfield, near London, England, of Sir Frederick Palmer, the man whose recommendation caused Churchill to be developed as Western Canada's northern sea outlet.

When Hon. C. A. Dunning assumed the portfolio of minister of railways in the Dominion cabinet in 1926, he went to England for Sir Frederick, one of Britain's most noted engineers.

Sir Frederick went into the northland and after an extensive investigation, recommended to Mr. Dunning that Churchill be the northern port instead of Nelson.

The recommendation was acted upon, and Churchill became the outlet to the world for Western Canada via the sea.

For many years Sir Frederick was chief engineer of the Port of London Authority. He served as consulting engineer for many railways both in the old country and India, in addition to being engineer of the Calcutta port. In 1929 he was named engineer for the new \$62,000,000 Charing Cross bridge, London.

Recipe For Iced Tea

Use six heaping teaspoons of "Salada" Black Tea. Brew tea in one pint of freshly boiled water for six minutes. Strain, and pour liquid into a quart container. While hot, add 1½ cups of granulated sugar and juice of 2 lemons. Stir, or stir contents well, until sugar is fully dissolved. Fill container with cold water. The iced tea is cool before adding the cold water. Otherwise liquid will become cloudy. This is now ready to serve in tall glasses with chopped ice or cubes. A slice of lemon may be added if desired. The above will make two quarts of iced tea, or seven tall glasses.

Soldiers Stayed In France

Over Thousand Americans Married And Made Home There

More than fifteen years after the bugles blew "cease firing," about 1,100 American veterans of the World War linger in France. Most of them are "voluntary exiles" for the sake of French wives. Their numbers are dwindling, however, for in 1931 they were 1,700 strong, figures gathered by the American Legation in Paris. More than half live in Paris; the rest are spread over forty-nine departments.

Willing To Co-operate

"Woman is very unreasonable," said a sensible New Englander, justice of the peace. "I remember that my wife and I were talking over our affairs one day, and we agreed that it had come to the point where we must both economize. 'Yes, my dear,' I said to my wife, 'we must both economize.' Both 'Yes,' said Henry," he said, with a tired air of submission, "you shave yours, and I'll cut your hair."

Fifty years in which to pay costs of the court, totalling \$750, has been given to an unsuccessful litigant, Bernard Kelly, a dock laborer in Liverpool.

BABY'S CRAMPS Banished!

"When I could not sleep at night with baby's cramps, it was Baby's Own Tablets that cleared the little system of offending substances and gave sweet sleep and rest." That is what Mrs. Robert Greenham, Philadelphia, Ontario, writes. Baby's Own Tablets are mild and soothing in action, yet most effective and always safe for colic, teething troubles, constipation, summer complaint, upset stomach, restlessness and simple fever. Try 25c every where.

BABY'S OWN TABLETS

Author Of "Beautiful Joe"

Miss Margaret Marshall Saunders Receives Recognition From The King

Smiling and happy at being named in the King's birthday honors list, 73-year-old Miss Margaret Marshall Saunders received many congratulatory messages from friends in Canada and the United States. She was named a Commander of the British Empire.

"The honor done me is as much an honor to the women members of the many clubs with which I have done humane work," said Miss Saunders, whose story of "Beautiful Joe," a dog, has been published in 14 languages, put into Braille and is now being translated to Japanese and Burmese. "It touches me much," she said, "that such a tribute should be given to the humane side of women's work."

Miss Saunders, who was born at Liverpool, N.S., did her first serious writing after she was 30 years old. She entered in a United States contest her "Beautiful Joe" as a companion story to "Black Beauty," then being widely published on behalf of humane work. Her entry won the prize and her work became known throughout the world.

Alter Colonial Sugar Duties

Britain Diverts West Indies Product Back To Canada

The British House of Commons has approved proposals contained in a white paper issued in April to alter the colonial sugar duties in such a way as to divert the flow of the commodity to Canada.

The white paper, issued when the budget came down, would send sugar back to Canada from which it is driven when the pound sterling reached a premium in Canadian funds.

Fall in value of the Canadian dollar dislocated the sugar trade between the Dominion and the British West Indies and sent most of the commodity to the United Kingdom.

The New Style Bicycle

Velocar Allows Rider To Assume Semi-Horizontal Position

Rest when you cycle, may be the sales slogan of Stewart and Ernest Worrall, of Hamilton, Scotland, for their new invention, which they call the velocar. They predict a day not far distant when the ordinary bicycle will take its place beside the bone-shaker as a relic of the past. The rider of the velocar sits in a semi-horizontal position, thus making it more comfortable than the ordinary machine, and the handlebars stretch almost from the front to the back wheel. A recent race between velocarists and cyclists in Paris resulted in an overwhelming victory for the new machine.

Hurricanes On The Sun

May Cause Drought And Dust Storms Says Veteran Student

Swirling hurricanes on the sun may be the cause of droughts and dust storms in the Mid-West. These great solar storms, which appear to astronomers as mere sun spots are reaching an 11-year period of maximum intensity. Dr. C. G. Abbott of Smithsonian Institution, Washington, veteran student of the sun and long-range weather predicting, is confident they have a great effect on weather all over the earth. And "I would not say flatly that they have no connection with this drought in the Mid-West."

Don't Read This

Unless you are interested in a medicine which has helped over 700,000 women and girls. Take it before and after childbirth, at the change of life, whenever you are nervous and "it helps me."

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

Martyr To Radium

Last Of Scientists Who Aided Mme. Curie Is Dead

Henry T. Koenig, 42, a chemist of Denver, Colorado, who had worked for years under a self-imposed death sentence, died a martyr to his research work in radium.

Koenig was the 20th to die of the 20 scientists who aided Mme. Curie, discoverer of radium, in her research work.

One by one, Koenig's companions died from malignant infection induced by contact with the mineral. But he continued his work, although he knew that each contact further weakened his system. Through his work and that of his companions thousands have been given relief.

Koenig's work in perfecting a system whereby radium extraction could be accomplished at a lower price than ever before was recognized by authorities as one of the greatest contributions to medical science.

He studied the rich radium ores of the Belgian Congo in 1922 and 1923. His development of the ores in this region remedied all danger of a monopoly in radium.

During the World War he adapted radium to practical use in warfare. The use of radium for the illumination of watch dials at night was the result of his research.

Three months ago he was ordered to Porter's Sanatorium, suffering from cancer of the hip. Treatment failed to check the disease and he died.

Irrigation Plans

Proposal To Irrigate Large Block Of Land In Southwest Saskatchewan

Irrigation for between 5,000 and 10,000 acres in southwest Saskatchewan is proposed in a plan to be urged before the Saskatchewan government.

Facing a feed shortage for the third successive year, farmers around Valmarie and Cadillac ask \$100,000 expenditure to build a dam on the Frenchman river with a 15-mile main ditch south and east through foothills.

Alfalfa would be sown with two crops a year, providing a likely crop of 25,000 tons or enough to feed 20,000 cattle.

An experimental dam is being built by George Newton to serve his farm of five miles west of Valmarie. J. R. Reid, Regina, is doing the engineering work. A small dam is being built at the Frenchman river, pump installed, and the scheme developed to supplying about 250 acres.

Mr. Reid said that with two crops a year about 1,250 tons of alfalfa can be grown, sufficient to feed 1,000 cattle.

Canada Leads The Way

Comes First In Industrial Recovery According To League Figures

Canada leads the way in industrial activity. League of Nations figures for the first quarter of 1934, compared with the first quarter of last year, show these per centage increases in industrial activity:

Canada, 40 per cent; United States, 30 per cent; Germany and Poland, 25 per cent; Sweden, 18; Japan, 11; Norway, 6; France, 3.

Unemployment is decreasing in all the principal countries of the world except France.

World production of certain important commodities shows an appreciable increase, the figures also reveal. During the first quarter of 1934, production of coal increased by 20 per cent, of gasoline 12 per cent, pig iron 51 per cent, steel 54 per cent, and zinc 37 per cent, in comparison with the same period of last year.

On the other hand the gold value of world trade again shows a decrease for the first quarter of 1934.

Fraudulent Stock Promotions

Government To Put Spoke In Work Of High-Pressure Salesmen

The House of Commons took the first step recently to spoke the work of high-pressure stock salesmen when it reviewed the Consolidated Companies Act which practically remodels the laws governing company formation.

Designed to stop fraudulent stock promotions, the bill would make it impossible to sell promotion stock except through a prospectus, approved by the secretary of state. Among other provisions, fines and imprisonment would be established for any house-to-house stock canvasser or any organization that to promote a telephone and sucker list to promote sales. Penalties would range from \$500 for a first offence to \$1,000 and a year in jail for subsequent convictions.

Hero Of Russo-Japanese War

Admiral Togo, Who Died Recently, Was Idol Of Japanese People

Admiral Marquis Keishichiro Togo, the silent little man whose destruction of the Tamr's Russian fleet 29 years ago placed Japan among the great powers, died at Tokyo recently. At the age of 86 and with the rank of Japan's greatest hero, he surrendered to cancer of the throat. Admiral Togo was the last and most illustrious of all the heroes of the Russo-Japanese war. For several weeks he had been seriously ill. The day before he died the emperor elevated the aged sea hero from the rank of count to that of marquis. Posthumously he was promoted to admiral—the highest court rank.

It is now possible to determine the speed of lightning by use of special photographic apparatus. Experiments of this kind recently revealed that the average speed of lightning is around 28,500 miles per second.

Naturalists have discovered that spiders live to a ripe old age. Nevertheless their life often hangs on a thread.

Stand Taken By Argentina Disregards The Wheat Agreement

London.—Anxiety of other big wheat exporters over the attitude of Argentina to the London wheat pact turned into open alarm as evidence accumulated that the Argentine, to all intents and purposes, had thrown the pact overboard.

Under the agreement signed in August last year, Argentina, Canada, Australia and the United States agreed to keep their wheat exports in the crop year ending July 31 next to a definite limit. In the case of Argentina, it was 110,000,000 bushels.

Argentina now has actually exceeded this limit by at least 4,000,000 bushels. On top of this considerable ocean freights have been booked and forward wheat sales made for June and July. Obviously, the Argentine government has no intention of placing an embargo on further wheat shipments in the period of the agreement, which would be necessary to observe the pact.

More seriously regarded by delegates to the world wheat advisory commission, which is in a state of suspense, is the fact that Argentina seems to be entirely unconcerned about keeping her shipments within the legal framework of the pact. Knowing some weeks ago that Argentina would very likely exceed her quota, representatives of the other principal exporters last month offered her a "loan" of about 40,000,000 bushels from their own export quotas. The Buenos Aires government has not even replied to this.

Consequently, there was talk of a "wheat war," with Argentina's competitors, including Canada, dumping stocks on the market. The Australians are particularly bitter over Argentina's marketing methods. Always strongly opposed to suggestions of production restriction or restriction of exports, which are much the same thing, the Australians entered into the agreement with the utmost reluctance. If Argentina flagrantly disregards it, the Australians may follow suit.

Rain Checks Forest Fires

Raging Less Furiously In Maritime But Serious In Ontario

Toronto.—Forest fires continued to burn in scattered areas of Maritime Canada and Newfoundland, but less furiously for rain in some districts held them in check. The situation in Ontario continues serious and 600 men are fighting the blazes.

Forest protection aviators reported an outbreak on the international border between Maine and New Brunswick that had been raging unnoted for a week, leaving in its wake a worthless stumpage of 40,000 acres.

Death Sentence For Theft

Seven Persons In Ukraine Receive Heavy Penalty

Kiev, U.S.S.R.—Seven persons accused of taking part in organized thefts of money and supplies from the agricultural supply trust were sentenced to death by the supreme court of the Ukraine, and 24 others were given prison terms ranging from one to 10 years.

The convicted persons, all of whom were employees of the trust, included a number of members of the Communist party.

United States Congress Gives Roosevelt Power To Negotiate Tariff Treaties

Washington.—The United States congress has given President Roosevelt unprecedented power to negotiate reciprocal tariff treaties and almost at the same time Germany and Argentina acted to be among the first to negotiate the new pacts. Quick acceptance by the house of representatives of senate amendments to the legislation completed congressional action and the measure was sent to the White House where the president was expected to sign it into law without delay.

In voting the measure congress delegated to the president vast authority, previously jealously guarded by the legislative branch, to increase

Radio Investigation

Verbal Battle Before Committee Dealing With Charge

Ottawa.—A declaration that Hector Charlesworth, chairman of the Canadian Radio Broadcasting Commission, "knew nothing whatsoever about broadcasting when he was appointed, and knows little more now," was contained in a brief filed with the house committee on radio by E. A. Weir.

Mr. Weir, who was director of radio for the Canadian National Railways and was secured by the commission when it was first established, was the basis of his long experience to the new organization. He was later dismissed. The brief was the third shot in a verbal battle before the committee in which the commission met charges of inefficiency and mismanagement with counter charges of officiousness, interference and inefficiency on the part of Mr. Weir.

The brief was supported by letters from W. D. Robb, former vice-president of the Canadian National Railways; Hon. Charles A. Dunning, who was then minister of railways and canals; Major Gladstone Murray, British Broadcasting Corporation expert, who assisted in organizing the Canadian commission, and from Dr. E. A. Corbett, director of extension, University of Alberta. These letters were to Mr. Weir's efficiency and worth as an executive, particularly with relation to radio matters.

Held Many Important Posts

Former Resident Of Winnipeg Died Recently In England

Winnipeg.—W. L. Griffiths, former secretary to the Canadian high commissioner in England, died at London June 5, according to cabled advice received here. Death was ascribed to heart disease. He was 69 years of age.

Mr. Griffiths came to Winnipeg from Bangor, North Wales, 50 years ago and was one of the first exporters of Manitoba wheat to Great Britain. In 1887, during the government of Sir Wilfrid Laurier, he was appointed Canadian commercial agent.

He succeeded J. G. Colmer as secretary to Lord Strathcona, then high commissioner, in 1903. Later he became the right-hand man of Sir George Perley and served during the World War period. He retired shortly after Rt. Hon. P. C. Larkin took office in 1924. Two sons survive.

Warning Up In Antarctica

Little America, Antarctica.—Sleeping bags have been laid aside for blankets by some members of the Byrd Antarctic expedition as a "hot spell" shows no signs of relenting. The temperature reached 25 degrees above zero, about 10 degrees higher than the maximum recorded by any previous explorers of the Antarctic.

Barricaded Highway

Bend, Ore.—Angered, police said, because passing motorists would not give him a "lift," Fred Ott, a hitchhiker, barricaded the Dalles-California highway north of Bend with boulders. He finally got a ride to the Deschutes county jail, with Sheriff Claude MacCauley.

Advocates Works Program

Premier Pattullo Of B.C. Urges Huge Expenditure

Vancouver.—Premier T. D. Pattullo returned to his long-time advocacy of a \$200,000,000 public works program in Canada, and in the same address declared British Columbia would pay the principal of her debts 100 cents on the dollar.

He was addressing a joint gathering of the Vancouver Board of Trade and Canadian Club.

"I don't want to inflate," he said, outlining his public works proposal. "I don't want to take a dollar from a man who has it, but he is going to lose it if unemployment continues."

The difference of opinion between his government and the Dominion on public works, was not one of principle, but of amount.

He suggested sufficient currency could be issued to create a credit of \$200,000,000, which could be loaned to the provinces on a per capita basis without interest. It would be paid back through a sinking fund within the lifetime of the works undertaken. The increase in debt would not be sufficient to hurt the country's external credit.

To Build Elevators

Moscow Getting Ready For Future Bumper Crops

Moscow.—The Soviet union is holding herself in readiness for future bumper wheat harvests by building great grain elevators, Tass, the Soviet news agency, reported.

Before the revolution the number of grain elevators in Russian territory was insufficient. Since 1924, however, the government has proceeded with the construction of new elevators and the reconstruction of old ones.

By the end of 1932 there were already 574, with a total capacity of 2,000,000 metric tons. (A metric ton is 2,205 pounds.) During the first five-year plan 105,000 elevators were devoted to these undertakings.

During 1933, the first year of the second five-year plan, elevators having a total capacity of 180,000 tons were built. This year many of these elevators, including that of 50,000 metric ton capacity at Mariupol, will be put into service.

Praises Wheat Pool

Premier Bennett Says Alberta Pool Has Helped Farmers

Ottawa.—"I still think that no wheat pool has operated more reasonably and beneficially to the people concerned than has the Alberta wheat pool," Prime Minister E. B. Bennett declared during the course of the debate on the Marketing Act.

He personally witnessed the formation of the Alberta wheat pool and had a part in the task as legal adviser. Manitoba and Saskatchewan also established pools.

"If they endeavored to project their idea into the world market without full understanding of what was involved and met with a measure of disaster, that does not militate against the soundness of what they were attempting to do," the prime minister said.

PROF. F. H. ANDERSON

of the Department of Philosophy of the University of Toronto who will be one of the Canadian representatives at the English International Congress which meets in Prague this summer.

France To Export Wheat

Has 1,500,000 Bushels To Sell At Fifty Cents Is Report

Paris.—Reports were current here France is prepared to export more than 1,500,000 bushels of wheat at a price of slightly less than 50 cents a bushel. The wheat, it was said, would go to the United Kingdom and Denmark.

Usually well informed sources said they expected the French government would be asked to maintain a minimum domestic wheat price at a level to be determined after the yield of the current crop becomes known.

It was reported 50,000 metric tons (1,333,333 bushels) of wheat would be exported to Britain and Denmark at 28 francs (currently \$1.92) a quintal. That would place the price at 49½ cents a bushel, f.o.b. French ports.

In addition the government would grant an export bounty of 80 francs a quintal (about \$1.41 a bushel) bringing the total price paid exporters to 108 francs a quintal (\$1.91 a bushel) as compared with the present minimum domestic price of 130 francs a quintal (about \$2.30 a bushel).

To Make A Profit

Government Stands To Make \$33,000,000 On Sale Of Gold

Toronto.—The federal government stands to make a profit of approximately \$33,000,000 in the gold which will be taken over from the Canadian banks at the statutory price of \$205½ an ounce, according to an estimate based on the latest official bank statement.

The government bank statement for April 30, the latest available, gives the amount of coin in possession of the banks as \$39,928,171. A Toronto banker estimated for the Canadian Press that 95 per cent. of about \$38,000,000 of the total, was in gold coin. In addition the banks hold at agencies outside Canada \$9,159,554, bringing the total up to \$47,000,000. The prevailing premium on gold, now selling in New York at \$35 an ounce, is about 70 per cent. over the old price of \$20.67, giving a profit of \$33,000,000.

BRITISH COLUMBIA HONORS FAMOUS EXPLORER

Here we see Mr. W. McAdam, Acting Agent General in London for British Columbia, placing a wreath on the grave of Captain George Vancouver, the explorer, to commemorate the 136th anniversary of his death. The man who gave Vancouver his name is buried near Petersham Church, Richmond, Surrey.

Prime Minister Gives Optimistic Picture Of The Future Of Canada

Planning Abandonment Of Duplicated Lines

Railways Co-operating In Effort To Reduce Expenses

Ottawa.—It would be improper for the trustees of the Canadian National Railways to enter into any controversy over the suggestions for amalgamation publicly advanced by E. W. Beatty, president of the Canadian Pacific, in opinion of C. P. Fullerton, chairman of the trustees, expressed before the house committee on railways and shipping.

Mr. Fullerton made his second appearance before the committee and presented a brief covering three phases of the railway problem, co-operation with the Canadian Pacific, capitalization and amalgamation proposals.

The co-operation efforts up to date had yielded a saving estimated at \$1,200,000 in yearly joint economies. Projects of co-operation to reduce duplication now under study involved abandonment of approximately 2,100 miles of line on 36 different projects, while Canadian National economies contemplated further "abandonment" of 1,150 miles of light-traffic lines in various parts of the country.

R.C.M.P. Colors Arrive

Arrangements Being Made For Formal Presentation In July

Regina.—Of dark red silk, four feet by two and one-half feet in size, the Royal Canadian Mounted Police colors have reached Regina headquarters from London, England.

Colors will be formally presented next month. Arrangements for the presentation are being made by Ottawa.

The colors are elaborate and embellished with battles in which the force took part in its 61 years' service.

Battles commemorated on the colors include the Northwest Rebellion of 1885; the South African uprising of 1900-02; the Great War and the Siberian expedition of 1918-19. Until the present, the force has never had its own colors.

Manitoba House Prorogues

1934 Session Of Legislature Brought To Close

Winnipeg.—The 1934 session of the Manitoba legislature stood prorogued with legislation enabling farmers of the province to organize under the Dominion Marketing Control Act written into the statutes. The vote was 37 to seven.

It was amended by the premier to permit setting up of a marketing board to function under the Dominion act as well as under provincial statute. The provision authorizing the co-operation with the Dominion board remains in the bill.

Approval was given a resolution urging the federal government to continue unemployment relief arrangements.

Marketing Bill Receives Third Reading After Weeks Of Bitter Debate

Ottawa.—Climaxing weeks of bitter debate the House of Commons divided 55 to 35 in support of third reading of the marketing bill.

Unleashing a typical verbal barrage, barbed with pent-up resentment at criticisms and charges leveled at the administration by the Liberal opposition, Prime Minister R. B. Bennett presented the final government argument, declaring that every year it was in office the Mackenzie King government enacted legislation delegating to lesser bodies of its creation the powers it now claimed were the sole prerogatives of parliament.

This was in reply to the main attack of the opposition. If the opposition believed the government was doing wrong in delegating powers to marketing boards, then it was going against not only the highest court in the Empire, the privy council, but against its own policies when in power, said Mr. Bennett.

Bitterly denying charges of the opposition that the bill was but a

step toward a proposed centralization of marketing regulation within the Empire, Mr. Bennett declared "this legislation is for Canada and Canadians."

"I have no apologies to offer for the trade agreements of 1925," the prime minister added. "But for those Ottawa agreements this country could barely have survived."

Hon. W. R. Motherwell (Liberal, Melville), minister of agriculture in the government of Mr. Mackenzie King, who was one of the loudest critics of the measure, split with his party in order to support it because, he said, imperfect as he found it in detail the principle of assisting the farmers to secure a better return for their effort was one he could not oppose.

It was the sole Liberal supporter. All of the Progressive group supported the measure and the Conservatives voted solidly. The two Independent members voted with the Liberal opposition.

NOTES AND COMMENTS

OXFORD Group meetings at Banff indicate that even newspapermen are becoming penitent and admitting, like a good many more who suddenly appear to see the light, that they have been terrible sinners. The confessions we read of at Oxford Group meetings indicate that many outwardly appearing saints were in reality sinners like the rest of the common clay. It is to many observers amusing and at the same time a trifling nauseating to read of these emotional meetings, where one will swear off smoking, another will vow not to indulge in unethical practices of which he may have been guilty, and many other "swear-offs" which the average right-thinking man whose daily life is based on religious conviction will do without bawling it forth in an Oxford Group meeting. It savors somewhat of a glorified "holy roller" meeting, not quite as noisy, but in a somewhat similar strain. The participants, many of them, come from higher stratas of society than the rescued sinners of the Salvation Army, yet both are turning people towards higher planes of religious life. The average person shuns emotionally religious people, yet it seems it is only by something of a more spectacular nature than going quietly to church and kneeling in prayer or in the seclusion of the home that some people are awakened to the consciousness of sin. Yes, there are many "hopeful heathens" who view the Oxford Group with non committal interest.

TO-MORROW is circus day in Cranbrook, and many an adult will tell others he or she is taking the children to see the animals while they are just as eager themselves to see the big show. The blare of the band, the blood-sweating hippopotamus, the graceful bareback riders and the clowns with their tomfoolery delight the children, while grown-up children live again their early experiences when the circus comes to town.

C. R. McINTOSH, Liberal member in the Federal house for North Battleford, is an "ornery" cuss. He put in to Hansard records words which Hon. Mr. Weir states he did not use, in referring to a certain class of immigrants as "political cattle." It is an insulting term, and if Mr. McIntosh manufactured the term for political purposes and was so anxious to have it recorded in Hansard, it would appear it is just another striving for effect among his constituents. Mean business, we would say. This is the same gentleman who for years has been agitating in the house for a distinctive Canadian flag, a proposal which is sidetracked every time it comes to the point of voting.

THE Stevens enquiry at Ottawa bring out to full view sweatshop methods by which clothing is manufactured for mail order houses. Scandalously low prices were paid to workers, and in turn these sweatshop produced clothes were purchased by workers throughout Canada. If the workers sincerely wish to protect their own class, they will refuse to purchase goods produced under such methods. But will they?

THAT nerve-soothing pastime, angling, will draw its devotees to the rivers and creeks for the next three months. June 15 is looked forward to by young and old, and flies, rods and all the gadgets necessary to catch the wily trout have been prepared by the enthusiasts. Some think it a waste of time to go fishing. On the other hand the angling enthusiast thinks it a waste of time to hunt for golf balls. Each to his liking.

WAR DEBTS continue as a controversial issue between Great Britain and other European powers and the United States. The credit of Great Britain is pledged for over 60 years to pay under the original terms of settlement. Since then there has been a considerable reversion of feeling. Great Britain's debtors are unable to pay, and many in the States outside of Congress feel that Great Britain should not be asked to pay. The Christian Science Monitor editorially states that though the United States officially declared war in 1917, it was not until 1918 that their soldiers were in the fighting line, and during that time the Allies were losing men and using up supplies bearing the States share of the fighting.

GREAT BRITAIN has offered to repay the war debt in the same way it was incurred, by shipping goods to the States. But Congress plainly says "we want the money." The debt was incurred in a common cause, credit was provided in the States whereby Great Britain could purchase immense quantities of supplies during the war, and a war-time profit was made by those firms selling the goods. Trade is being hampered to such an extent that many men of high standing in the economic and financial field frankly state it would be to the interests of all countries concerned if the war debts were cancelled.

DOMINION DAY is worthy of celebration by Coleman. The co-operation of all business men is essential to provide a day of sports for the younger people. Help the committee to make it successful.

Kimberley Promises Strong Support to Musical Festival

Mr J. E. Upton, an energetic executive officer of Crow's Nest Pass festival received the following encouraging letter from George McIntyre, conductor of Kimberley Orpheus Choir:

"Just a word of thanks to the teachers of Crow's Nest Pass and their pupils for a wonderful treat. How I enjoy your strings. Carry on the good work."

The Orpheus has decided on Blairmore, so in modern phraseology—"we'll be seein' yah. We will try to enter as many classes as possible, choral society, ladies chorus, male voice quartets and solos. I think you will see bigger and better entries, so do not be discouraged at lack of interest here."

I was sorry I could not see more of you at Cranbrook, but I suppose Blairmore will be the same for you—busy all the time. Never mind; you are all doing a good thing and doing it well. The respects of the Kimberley Orpheus to our Crow's Nest friends."

534 Launching Sept. 26

The super liner No. 534 of the Cunard Line will be launched on Sept. 26 in the presence of royalty. Queen Mary will officiate at the launching ceremonies in the presence of King George. The River Clyde has been especially widened to provide adequate space for 534, by far the largest vessel ever to be constructed in British yards. The ship is being built at the yards of John Brown Company. Its gross tonnage is 70,000 and is over 1,000 feet long. There will be accommodations for more than 4,000 passengers. It is interesting to note that the hull of the first Cunard liner built, the "Britannia," could pass through one of the funnels of the super liner.

Masonic Grand Lodge Meeting in Edmonton

William Borrow, worshipful master of Summit Lodge, A. F. & A. M., left on Tuesday to attend the grand lodge annual convocation in Edmonton. Robert Oakes, worshipful master of Rocky Mountain lodge, Blairmore, was the delegate from that lodge. G. E. Cruickshank M. L. A., past grand master of Alberta, went from Sentinel Lodge, Hillcrest, also Chas. Emmerson, master of the lodge.

H. A. LeRoy, worshipful master of Fernie Lodge, represents his lodge at the Grand Lodge of British Columbia, being held next week at Powell River, B.C., a C. P. R. coastal steamer having been engaged to accommodate the delegates from Vancouver to Powell River, and which will be at their disposal during the three days of the sessions.

Jerry Lonsbury has a grievance. A telephone guy wire in front of his house is liable to cause injury by running against it in the dark, much in the same way as a man might almost cut his throat crossing a vacant lot where a clothes line is strung. He's going to write to Edmonton about it, and if they do not take action, he will.

WORLD HAPPENINGS
BRIEFLY TOLD

Holland is reported to be concerned over the intensive trade invasion by Japan of the Dutch East Indies.

The oldest continuously published newspaper in Canada, The Montreal Gazette, recently celebrated its 156th birthday. Its first issue appeared June 3, 1778.

The calling of an imperial conference for the creation of an Empire air force will shortly be suggested by Lord Eilbank in the House of Lords, it was learned.

Belgium may pay her 1934 war debt instalment to the United States with a \$10,000,000 shipment of radium, according to an unconfirmed report at Brussels.

John L. Beckwith, former mayor of Victoria, and resident of British Columbia since 1884, died recently. He had engaged in the salmon canning business for 31 years. He was born in Cornwallis, N.S.

Wiley Post, round-the-world flyer now tuning up his plane for the London-to-Melbourne \$750,000 air derby in October, recently announced he also has his eye on the world's altitude record.

The German version of the motion picture, "The Trial of Mary Dugan," was banned from theatres of the Reich because it was regarded as a plea against capital punishment, it was learned. As such it was contrary to Nazi principles of law enforcement, it was explained.

The British House of Commons approved repeal of the duty on insulin, diabetes remedy discovered in Toronto by Sir Frederick Banting who was knighted in the Queen's birthday honors list. During debate on the move congratulatory references were made to Sir Frederick.

Two-and-a-half million feet of lumber will be shipped over the Hudson Bay Railway and through the port of Churchill in northern Manitoba to Great Britain by The Pas Lumber Company of The Pas, Man., according to D. D. Rosenberg, secretary-manager of the company at Prince Albert.

Train Run By Electric Eye

Invention Tested By German State Railways May Be Adopted

Trains in Germany will be operated by an electric eye if an invention recently tested by the German State Railways is adopted. Control of a train is through photo-electric cells which operate the brakes by means of a light signal, but the light itself is provided by the engine. A dynamo on the locomotive feeds a lamp which throws an almost vertical cone of light into the air. Mirrors are arranged on upright supports at points along the line, and if the signal is against the train the mirrors will be in such a position as to meet the beam of light and throw it down on a pair of photo-cells mounted in the searchlight of the engine. The electric current from the cells operates a relay, and the brake magnets are opened and the train is brought to a standstill. The speed of the train can be automatically adjusted.

Thousands Always Ill

Reducing Funds For Public Health Not Sound Economy

Elimination of disease has done more to increase material prosperity than any other one thing, declared Dr. Gordon Bates, of Toronto, general director of the Canadian Social Hygiene Council, in an address in Ottawa. But even to-day two per cent. of the population was constantly ill, representing 160,000 adults in Canada. Parsimony in the expenditure of public funds for public health was unsound economy, maintained the doctor. The administering of toxoid to children who were well would prevent diphtheria. Compulsory pasteurization of milk was another preventative that should be insisted upon in the interests of national health.

Railway Workers Musical

More than 2,200 railway workers took part recently in a musical festival in Reading, England. They came from all parts of England and Wales, and the contests were held in four walls. Pianos were submitted by a dock foreman, a fitter, a hammer and a tube cleaner. In the champion solo class there were heard the voices of a wheel tapper, a lampman and a clerk.

A world shortage of antiques is reported. This is in spite of the fact that many factories are working overtime to keep up with the demand.

Find Indian Relic

Think Credit For Introducing Golf Should Go To Natives

The latest development in discovery of Indian relics around the Chaplin area, west of Moose Jaw on the C.P.R. main line is a ball of some sort of rock, light yellow in color, and smaller than a billiard ball. It is approximately the size of a billiard ball and was found by a member of the Reibelt family on whose farm many arrow heads and other Indian relics have been located. Queries are being bandied about in Chaplin as to whether the credit for introducing golf should go to the Indians rather than to the Scots. Nothing resembling a golf club has been found as yet so maybe it was marbles or bowls that the original prairie denizens enjoyed in their spare time.

Air Mail Service In Britain

Establishment Of Regular Service For Summer Months

For the first time in British aviation history, ordinary mails were carried by air when the new air mail service between Inverness and Kirkwall, linking the far north of Scotland, was inaugurated.

Sir Frederick Williamson, director of postal services, at a luncheon in Inverness, pointed out establishment of the regular service for six summer months marked a great step in the internal air mail development now beginning, alongside railway and shipping as a regular agent for carriage of mails.

INTRIGUING NECKLINE—SMART COOL SLEEVES LINES THAT SLENDERIZE THE HEAVIER

FIGURE
To-day's model is just perfect for hot weather wear. Besides being unbelievably easy to make, it's surprisingly inexpensive. The pattern includes clear instructions as how to cut it out and put it together. The scalloped treatment is optional. The pattern also provides for the neckline, sleeves and hipline to be cut with a straight edge.

Carry it out as the original in a handkerchief-finish lawn print in blue on grey ground—you'll love it. The white organdie vest gives it a dainty touch.

Stir—1 seersucker can be worked out very effectively in this model. Tub silks in white and pastels are charming too.

Style No. 567 is designed for sizes 36, 38, 40, 42, 44, 46, 48 and 50 inches bust. Size 36 requires 3½ yds. of 30-inch material with ¾ yard of 35-inch contrasting and ¾ yard of 35-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

"STRAIGHT AS A DIE"

Our picture shows the wonderful regularity which the Royal Air Force detachment presents as the men rehearse their famous massed drill in preparation for the Royal Tournament at Olympia. The photograph was taken at the Royal Air Force School of Physical Training at Uxbridge, England.

Woman Crown Attorney

Lady Lawyer Holds Responsible Post in British Guiana

When William Nedd, ex-postman, faced the charge of larceny of postal packets, the property of the British Guiana postmaster-general, it was a woman, Miss Iris de Freitas, B.C.L. who prosecuted on behalf of the crown. Nedd was sentenced to two years hard labor.

The talk of the Demerara assizes was the appearance of this remarkable lady lawyer, British Guiana's first and only woman in the exacting role of crown prosecutor.

She is the first woman in the West Indies and probably the first woman in the Colonial Empire to be given such an important post.

Miss de Freitas absolutely refuted the conscientious bachelor's suggestion that "Woman's place is still in the home". She is quite at home in the courts.

A modest, petite woman, her love of study lured her into pursuing legal honors.

Called to the bar at Georgetown, British Guiana in 1932, she won her spurs at the October sessions when she successfully defended the accused in a murder trial. She scored another personal triumph when she appeared for the crown at the full court of appeal. She is secretary to the franchise commission and legal assistant in the attorney-general's chambers.

Recipes For This Week

(By Betty Barclay)

GRAHAM CRUMB COOKIES

1 cup graham cracker crumbs
½ cup shredded coconut
½ cup sweetened condensed milk
3 egg whites

Blend together graham cracker crumbs, shredded coconut and sweetened condensed milk. Fold in stiffly beaten egg whites. Drop mixture by spoonfuls on a baking sheet covered with waxed paper. Bake twenty minutes, or until a delicate brown, in a moderate oven (350 degrees F.). Makes two dozen.

SAVORY STRING BEANS

Shred two medium-sized onions and saute them until they are tender in two tablespoons of butter. Mix the onions with a pint of strained, stewed tomatoes. Season with one teaspoon salt, one-fourth teaspoon pepper, a dash of cayenne, two teaspoons sugar, and two cloves. Bring to a boil and add one quart of freshly cooked string beans. Simmer for fifteen minutes, add a teaspoon of butter, and serve.

An editor was dining out, "Would you like some more pudding?" his hostess asked.

"No, thank you," replied the editor, absent-mindedly. "Owing to tremendous pressure on space, I am reluctantly compelled to decline."

In many parts of Germany the apple is deemed potent against war.

SUNDAY SCHOOL LESSON

JUNE 17

THE RISEN LORD AND THE GREAT COMMISSION

Golden Text: "Go ye therefore, and make disciples of all the nations, baptizing them into the name of the Father and of the Son and of the Holy Spirit; teaching them to observe all things whatsoever I commanded you: and lo, I am with you always, even unto the end of the world." Matthew 28:19, 20.

Lesson: Matthew 28:1-20.
Devotional Reading: Psalm 116:1-9.

Explanations And Comments

The Empty Sepulcher and Its Message, verses 1-6. The Evangelists make no attempt to describe the resurrection of Jesus; they tell it simply and briefly. Matthew tells of the visit of Mary Magdalene and the other Mary to the sepulcher late on Saturday night (the Jewish Sabbath), as the first day of the week began, to dawn. Mary Magdalene was from Magdala, a city on the western shore of the Sea of Galilee. She had been freed from "seven demons," Lk. 8:2, and often wrongly confounded with "the woman who was a sinner" of Luke 7. The "other Mary" was the mother of James, Mk. 16:1. They had both been present at the crucifixion and at the burial, Mt. 27:56, 61.

The messenger "answered" the look of fear and amazement of the women and said: "Fear not ye, for I know that ye seek Jesus, who hath been crucified." "The for gives a reason for the soothing tone of the address. He recognizes them as friends of the Crucified" (A. B. Bruce). Then he added the amazing news: "He is not here; for he is risen even as he said." Recall Mt. 12:40; 16:21; 27:63. "Come," he further added, "see the place where the Lord lay." The condition of the tomb as seen by Peter and John is described in Jn. 20:5-7.

The Risen Christ Appears to the Women, verses 9, 10. The women departed quickly with fear and great joy (how natural were both emotions here) and hastened to bring the disciples word. Their emotions were greatly augmented when Jesus himself met them, saying, "All hail!" Casting themselves down before him, they took hold of his feet and worshipped him. Kindly Jesus reassured them: "Fear not; go tell my brethren that they depart into Galilee, and there shall they see me."

The Final Luther and Communion, verses 16-20. The eleven disciples went to the mountain in Galilee where Jesus had appointed a meeting. It was a well-known meeting place, and there Jesus came to them in the appearance which probably is to be identified with the one mentioned by Paul in 1 Cor. 15:6, when he was seen by "about five hundred at once."

"All authority hath been given unto me in heaven and on earth"; in these words Jesus asserted his right to command.

The future of his kingdom was Christ's concern, and he issued his royal order: "Go ye therefore, and make disciples of all the nations, baptizing them into the name of the Father and of the Son and of the Holy Spirit; teaching them to observe all things whatsoever I commanded you." And lo, I am with you always, even unto the end of the world. May these words become to us not only a belief, but an experience.

A Remarkable Pilgrim

Woman Walked Twelve Times From Oberammergau To Rome

With the death at Oberammergau of Catherine Kopp, the most remarkable pilgrim of modern times has passed away. Of peasant stock, she lived to be eighty-four, and made, on foot, twelve pilgrimages to Rome. She knew three Popes and had planned another pilgrimage for this spring. Each journey, involving walking over 1,200 miles. On reaching Rome she went straight to St. Peter's to pray at the Apostle's tomb. On one occasion she started on her homeward walk a hour after the late Pope Pius X. had received her. She made her first pilgrimage when she had passed her seventeenth birthday.

Not American Innovation

The London Daily Telegraph says an Italian card, sent out by the Duke of Wellington, at the exhibition in the Royal United Service Museum, is a reminder that the dropping of the "u" in such words as "honour" and "labour" is not an American innovation. Like so many Americanisms it has Anglo-Saxon antecedents. The card asks for the "honor" of the company of Lieutenant-Governor Sir James Macdonell at the dinner given by the Duke to celebrate the anniversary of Waterloo.

The seven seed laboratories serving the seven inspection districts of Canada in carrying out the administration of the various Acts of Parliament by the Seed Branch, Dominion Department of Agriculture, are situated at Saskatoon, Montreal, Ottawa, Toronto, Winnipeg, Saskatoon, and Calgary. All chemical analyses are made at Ottawa, and the microscopical analyses also at Ottawa and at Toronto.

Agricultural Notes

Many Items Of Interest To The Western Farmer

While strawberries, like other fruits, are grown successfully on the prairies, they are not produced in commercial volume.

Sulphur has proved to be one of the most effective fungicides for the control of diseases caused by rust fungus.

Sales of hogs to stock yards and plant for the four months ended April 30 were approximately 19,000 more than for the corresponding period last year.

Of the clovers in 1933, red clover seed yielded particularly well in central and western Ontario, and this raised the total production in Canada above normal.

The basic reasons for the urge to form co-operative fruit associations in California during the past 60 odd years have been low prices to growers.

Shipments of livestock from Western to Eastern Canada for the first four months this year included 29,267 cattle; 14 calves; 82,908 hogs, and 40,493 sheep—all increases except hogs compared with last year.

In spite of the heavy decrease in Canadian exports of wheat to France in the past two years, this commodity still accounted for 61.56 per cent. of Canadian total sales to France in 1933.

The total value of the 1933 timothy seed crop is estimated at \$163,000 as compared with \$225,000 for the 1932 crop. The selling price per pound for the 1933 crop was about 6½ cents as compared with 6½ cents in 1932.

Grading and inspection of honey when exported are compulsory under the terms of the new Fruit and Honey Act. Honey, when shipped from one province to another, must also be graded, but inspection is optional except for administrative purposes.

The increase in the sales of branded beef in Canada for the first four months of this year was considerably more than two million pounds compared with the corresponding period of last year, namely, 12,209,056 pounds this year; 10,167,515 pounds last year.

One factor which is favourable to the consumption of Canadian and other Empire tobaccos in the United Kingdom is the decision of the United States government to restrict tobacco acreage and to force leaf prices to a more economic level by increasing the price to smokers.

Air-dried peat and muck will absorb 2 to 6 times their weight of liquid, and in this respect they compare very favourably with straw, the bedding material almost universally used on the farm. Peat moss, commonly known as moss litter, may absorb ten to fifteen times its own weight of liquid.

The government of Canada first appointed an official entomologist in 1884, but the real development and expansion of the work did not begin until about 1909 when the finding of the dreaded brown tail moth in shipments of nursery stock from France necessitated the passing of legislation in 1910, giving the government power to inspect plant products entering Canada, and to take steps to prevent the spread of insect pests already prevalent in the Dominion.

The European house cricket which is an annoyance in certain urban areas in southern Ontario is established in Ottawa, occasionally infesting dwellings, particularly furnace basements.

DENICOTEA Cigarette Holder absorbs the nicotine, pyridine, ammonia and resinous and tarry substances found in tobacco smoke.

Complete holder with refills — \$1.00 postpaid, or from your Drugist or Tobacconist. Dealers wanted everywhere.

SYNOPSIS

Camilla, Hoyt and Peter Anson

young and in love, marry secretly

deciding to live their own lives apart

until Peter is able to provide for her.

Peter is a young, struggling sculptor

trying to win a competition for a

scholarship abroad and Camilla is the

adored daughter of a wealthy family.

She is not to inherit money

when she comes of age and so is

studying commercial art in the hope

of landing an agency job. Others in

the story are Avis Werth, another

wealthy girl who is trying to win

Peter, Sylvia Todd, Peter's model,

and Gus Matson, his former room-

mate with whom he has quarrelled.

After a party at an exclusive club,

where the rest of the members of the

party go on a car trip to the lake,

Peter and Camilla slip off to the

beach by themselves and fall

asleep on the sand. When they awake

it is early morning and Avis and

another boy are standing near them.

This makes it necessary for Camilla

to announce before the party that

she and Peter are married. Camilla

urges Peter to accept some of her

earnings to help him along, but Peter

refuses and they quarrel. After

Camilla has gone from the studio,

Avis Werth calls and persuades Peter

to accept a loan of \$1,000. Peter

finishes his exhibit and asks Avis and

Camilla for suggestions as to a name

for it. Camilla suggests "Eager

Youth," and Avis "Inspiration."

Peter adopts the latter name. When

Camilla, heartily goes to Peter's

studio for quiet and to think. Peter

and Avis follow later, and as the

lights are turned on, see the statue

has been shattered to pieces. Avis

accuses Camilla of doing this. Camilla,

stunned by the disaster, and

hurt and horrified by the accusation,

faints.

(Now Go On With The Story)

CHAPTER XLVII.

The three exclamations over

the discovery were almost as one breath.

But the exclamations of the trio were as

different as the three individuals.

Peter sprang toward the scattered

pieces of plaster and sank down on

his knees with a groan like a great

building collapsing in an earthquake.

Avis' expression of horror changed

suddenly to angry accusation as she

turned to Camilla, who glanced per-

(Now Go On With The Story)

CHAPTER XLVII.

The three exclamations over

the discovery were almost as one breath.

But the exclamations of the trio were as

different as the three individuals.

Peter sprang toward the scattered

pieces of plaster and sank down on

his knees with a groan like a great

footsteps that resolved into stampeding thrash, confusion, that seemed to pass over her head, and tremble her into oblivion.

Voices, sounds, rushed back to her from a void . . . her head . . . where was she . . . what had happened? She tried to raise her hand, but it would not move, it was too great an effort to open her eyes.

The medley of sounds resolved into distinct words. Ah! Yes, she remembered. They had found Peter's statue destroyed and somehow, it was too much for her. Her thoughts slipped away again. Then a girl's voice—it was Avis—declared angrily.

"Of course she is! Jealous!" That was it. Avis had accused her of destroying Peter's precious work, and Peter—Peter had looked at her as if he believed it. Peter's angry reproaches, accusing eyes had added their plain to her first shock over the discovery, until she couldn't bear it. It was all so horrible. Why couldn't she have kept her senses and defended herself against them? Why had they accused her, she wondered for a bewildered second. Oh, yes, she had been alone in Peter's room, alone in the dark, when he and Avis came in and discovered the broken figure.

She moved her hands protestingly, opened her eyes. Cathie was bending over her. Terry was beside her. He said, "She'll be all right, now. Just let her rest. Don't try to talk to her."

Camilla was grateful for that advice. She wished they all would leave, and decided to be very quiet until they did. But just then she began to sob unreasonably. Tried desperately to stop, and could not.

"She's all right, now," Cathie pronounced. "Let her cry alone. She'll be gentle with sympathy. But the way you come out of a faint like that—either laughing hysterically or crying. Let's all get out of here. There, honey," she stroked Camilla's hand. "Take it easy now, and don't you try to leave tonight. Cathie's voice was gentle with sympathy, but edged with resentment when she spoke to the others, and managed to persuade them all to leave.

Finally the door closed after them and left a heavy silence which expanded and filled the room. Camilla was quiet now, her eyes closed. She was crying alone, wondering if she were cypselia alone. Someone stirred across the room, came toward her where she lay on the couch. She opened her eyes. It was Peter. Her heart ached when she saw how haggard and pale his face was.

He asked quietly, in a hollow voice, "All right?" She nodded, and slow tears rolled weakly down over her temples. She could not stop them. She held her hand toward him, appealingly, and whispered, "You—don't think—I did it, Peter?"

He did not touch her, drew his hand across his eyes, wearily. "I can't think. What's the use, anyway? It's done."

"But, darling Peter," she insisted suddenly to angry accusation as she turned to Camilla, who glanced perplexed from Peter to Avis, and was on her knees beside Peter in an instant.

Their hands fumbled futilely with fragments of plaster as if they would fit them together, but they only faced each other desolately. For moment they seemed to be paralyzed with the horror of this unbelievable catastrophe.

Finally Camilla faltered, "Oh, Peter darling!"

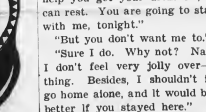

Anger flamed in his eyes, just as Avis demanded in a shrill voice, "How could you?"

Camilla looked wildly from one to the other. "How could who?" her dry lips whispered.

"You!" accused Avis. "You did it!" Camilla put up a protesting hand to push back the flames which leaped from Peter's eyes upon her, the room swayed and she sank down, down into a deep black abyss. Above her, she heard voices, faintly clattering.

Swollen Joints

often are a warning that your kidneys have become deranged and need attention. Don't suffer needlessly. Take Gin Pills to obtain relief and assist your kidneys to function properly.

W. N. U. 2050

gladly, to try to comfort him in his grief and disappointment. The fact that he did not believe she was guilty but there was that horrible weight of injustice that dragged at her heart and made it so difficult for her to say or do anything. As Peter had said, it was done, and no condemnation could change that. He could believe she was guilty, and still deny it. It made no difference to him.

The guests had gone, excited, in the traffic event of the evening, protesting her verdict. Avis was alone, as horrified as anyone involved in the tragic event of the evening. It wasn't just Peter's sculpture and his ambitions that were shattered, which had pre-eminence in her thoughts. What most appalled her was the sudden shattering of her own hopes and ambitions, which her own management had dreamed success. She had proceeded cautiously, tactfully, with her influences over Peter. Everything had gone beautifully until this evening. His sympathies gradually swerving in her favor, his criticisms of her work increasing gradually, his obligations and gratitude to her becoming more involved, his success imminent, his temporary separation from Camilla all but accomplished.

Had she been too bold in her confidence? Had she flattered her power over Peter too soon, and Camilla had taken this revenge? There could be no other explanation. Her grief was a mixture of defeat and anger. She was cornered, no way out now. Still—if Peter were made to believe that she had done this despite his threats to him, it was the end for them. He never would accept for his wife the woman who had deliberately ruined his first chance toward success. Perhaps, after all, she still held the winning hand.

She wondered what might be going on now behind that other closed door. Poor Peter was so stunned and grieved that he couldn't even think, yet. And with Camilla just recovering—could that faint have been posed to favor her innocence? Very likely probably would be said by either of them to-night. But she was glad that she had planned that little seed of suspicion at the first moment—the only time that would have been opportune for it. She could not have waited until tomorrow and calmly told Peter that she suspected Camilla. Impulsively, naturally in such circumstances, she had spoken his first thought that came to her mind. What explanation was more plausible?

She opened her door into the hall, stealthily, and listened. No sounds from Peter's room. She closed the door again and resignedly prepared for the night. There was nothing else for her to do.

(To Be Continued)

Find White Coral Reef

Chicago Geology Students Report

Discovery In Lake Michigan

Lake Michigan's water level was uncommonly low in a recent week.

Trooping along the shore near Chicago, a bevy of geology students from Central Y.M.C.A. College of Arts and Science were so surprised to see parts of a submerged reef well known to chartmakers jutting a few inches above water that they waded out to chip off samples. When they brought back their specimens to the instructor James H. Clapp, University of Chicago graduate student, he stared at the stuff, decided it was white coral, sent it to university geologists who confirmed his opinion.

Divers were sent to survey Lake Michigan's coral reef. It parallels the shore for 1,500 feet. Its flat top, evidently shored off by Pleistocene glaciers, Mr. Glasgow ascribed it to the Silurian period—400,000,000 years ago.

At that time the U. S. Midwest was covered by a broad bay of the ocean reaching up from what is now Central America, as numerous marine fossils found in the region testify. Lake Michigan's coral is the farthest north ever found. From Time.

No Doubt About It

Publisher Need Not Fear Editorials

Are Not Read

The Saint Ste. Marie Star is jubilant because it found a young man who prefers to read the editorial page first. The editor declares this has knocked on the head one of his favorite theories—that nobody ever reads the editorials.

Most editorial writers, it is true, often wonder whether their invisible audience is real or imaginary. But being human, sooner or later they err or unconsciously tread on somebody's toes, though ever so lightly, and come to the sudden realization that they have not been talking to themselves.—Fort Erie Times-Review.

MAKES FALSE TEETH FEEL LIKE NATURAL

There must be a reason Dr. Werner's Powder is the world's largest seller and prescribed by leading denturists; it holds teeth so firmly they fit so comfortably that all day long you forget you ever had false plates. Leaves no colored, gummy paste—keeps mouth sanitary, breath pleasant—the best powder you can buy for cost is small—any drugstore.

The Ingenious Asiatic

Japanese Are Great Imitators And Stop At Nothing

Everybody knows that the Japanese are a wonderful people, but few of us understand just how wonderful they really are. Every day brings new proof. Virginia tobacco growers, according to a Times dispatch from Danville, are greatly disturbed by the threat of an imitation Virginia cigarette made from native Japanese tobacco and flavored with a German extract from cheap Virginia leaf. The ingenious little Asiatic people who can imitate foreign electric bulbs and bicycles and gramophones are now imitating Nature's work in our Piedmont tobacco fields.

How will they stop? The prevalent impression is that they will stop at nothing. Universal unemployment threatens the nations because the Japanese will soon be making all the Grand Rapids furniture in the world, and all the Detroit automobiles, and all the Swiss cheese, and British Southdown mutton, and French champagne, and Mexican tamales, and Brazilian coffee, and Australian wool.

In every industrial trouble anywhere in the world to-day the motto is "Cheer up, Japan!" From the size of the Japanese "menace" there must be about 800 million Japanese and each one of them must be as clever as a thousand devils.—New York Times.

THE RHYMING OPTIMIST

By Aline Michaelis

A SINGLE PACE

"What shall I do with my life?" you say. With the years that are coming, grave years or gay? And while you wonder, life slips away!

Life is a road that stretches far, Glad years finished, brave years that are And you try to be, each aglow like a star!

The road goes winding, goes flowing by, From east to west and from sky to sky.

The road where your love and your toiling lie, It wanders and reaches from rim to rim.

Of far horizons, uncertain, dim, And no man knows what it brings to him.

Through your road for year after year You can trace, Through many a strange and lovely place,

You can shape it for only a single pace. All of life that is given to any man To fashion after his hopes' bright plan

Is a brief and brief space, is a footstep's span.

Must Stop Smoking

Chinese Students Are Ordered To Quit Cigarettes

A strict ban on cigarette smoking by Chinese students has been ordered by the Nanking ministry of education. A circular mandate has been sent to all provincial educational bureaus saying smoking by students must be stopped at once.

Since nearly all Chinese smoke, men and women and even little girls, used boys of first-grade age, the order will be very difficult to enforce.

A large number of varieties and species of plants in Canada contribute to the formation of peat and mud deposits. These plants for the most part are aquatic or semi-aquatic; that is, they grow under or in water, or at least flourish in saturated or water-logged soil.

IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED

Wake up your Liver

—No Calomel necessary

For you to feel healthy and happy, your liver must be in good shape. Without this, you are bound to feel wretched. Poison in the blood, General weakness, Headache, indigestion, constipation, all these things are the result of a liver that is not working properly. You need Carter's Little Liver Pills. Purely vegetable. They cleanse the liver, regulate the bowels, and remove all poisons. Get a box today. Refuse substitutes. See at all drug stores.

Electric Light For Lhasa

British Firm Permitted To Do Work In "Forbidden City"

Lhasa, the forbidden—and forbidding—city of Tibet will shortly be lighted by electricity. English materials, and English workmen, who are used to going into remote and backward parts of the world, are going to Lhasa to carry out the job.

The transportation of the equipment will be one of the most difficult tasks ever undertaken by a British firm. Hundreds of tons of material and machinery will have to be carried over 400 miles of some of the most mountainous and almost trackless terrain in the world by mules and porters, aided in some places by yaks which are the only animals that can live at an altitude of 17,000 feet above sea level. The caravan will have to go. More than 2,000 cases will be used to transport the material, which will then be assembled and set up in Lhasa.

The forbidden city is not quite so forbidden as it was recently, but it must have given the monks who rule the city of 30,000 people much misgiving before they gave consent to a British firm to do this work. Probably it took years of persuasion to obtain that consent. Lhasa is the most priest-ridden city in the world, and the lamas are opposed to modernization, their rule being built on a fabric of superstition.

No white man ever visited the place until an Englishman named Thomas Manning found his way there in 1911, and no other man ever reached there until the British sent an expedition in 1904. Since then only a comparative few have penetrated the fastness, and even to-day it is a city of dirt and squalor, utterly without modern conveniences. This may be the first step in the modernization of Lhasa.—St. Thomas Times-Journal.

Forgotten By Time

Lost Race Of Primitive Savages Found On Pacific Island

Mrs. Zita Baker, a young British woman, has returned to England, stricken with malaria after spending four enduring months among a "lost race" of savages.

Mrs. Baker is the wife of Dr. John R. Baker, of Oxford, leader of a scientific expedition sent out to the New Hebrides, in the Pacific, by the Oxford University Exploration Club.

"Some of the islands," said Mrs. Baker, "have never before been explored by white men. The natives were among the most primitive aborigines—a race forgotten by time."

"I used to go out with the women to cultivate the fields in the day-time. At night I slept with them in their huts. Often there would be as many as eight women to one hut."

"Firearms were unknown on the island, and the men had to hunt with bows and arrows."

Latest Thing In Elevators

Works Perfectly Without Any Direction From Human Hand

The latest thing in elevators arrives at your floor in response to your signal; opens its doors, closes them; goes about its business of collecting passengers at other floors, repeatedly opening its doors and closing them, repeatedly stopping, starting, without direction from human hand.

If you happen to feel it, it's an interesting sensation to find yourself in the hands and apparently at the mercy of a giant without conscience, pity, or any regard for his human charges. But if no appeal is possible, neither is there cause for complaint. And after a few trips you consign yourself to the machine without a qualm, serene in the realization that not all robots are Frankenstein's.—Christian Science Monitor.

Supplied The Material

Toronto Woman Used Gold In Wedding Ring For Filling

A well-known Toronto dentist the other day had a lady come in to have a gold filling put in her tooth. "I'd like to supply the gold," says the lady. "Well, we don't as a rule—do we?" he began. "Oh, but I really want to supply this gold," she says winningly. He gives in and goes ahead with the mold. Next day she trots in with a wedding ring.

"It's only 14 carat and we usually use about 22," he explains. But she insists on having the ring made in the lady. "This is my first wedding ring, and if I have it in my tooth I can still wear it without my second husband knowing anything about it!"

The dentist soaked the yellow metal home.

It takes a woman of decision to become a decided blonde.

ARM IN SLING WITH NEURITIS

"A token of gratification" this woman says she is giving when she writes of her relief from neuritis—"For twelve months I have had neuritis in my arm, and up till the last two weeks have had to carry it in a sling. Since then I have abandoned my sling, am able to sleep undisturbed, and can perform household duties that previously I would not have done. These benefits I have all had in two weeks, and I am optimistic enough to think that in another fortnight I shall have said good-bye to neuritis once and for all. Call this a testimonial if you choose—to me it is a token of gratification."—(Mrs.) N. E. L.

Neuritis is a result of impurities in the blood, which circulate all over the system and setting up inflammation in the tissues, that causes these excruciating pains. Kruschen Salts can be safely trusted to set the matter right. Because Kruschen contains just what Nature needs to persuade your internal organs back into a healthy, normal condition.

Little Helps For This Week

"For thus saith the high and lofty One that inhabiteth eternity, whose name is Holy: I dwell in the high and holy place with him also that is of a humble and contrite spirit, to revive the spirit of the humble, and to revive the heart of the contrite ones." Isaiah 57:15.

Without an end or bound Thy life lies all outspread in light. Ourselves feel Thy life all around. Making our weakness strong, our darkness bright; Yet it is neither wilderness or sea. But the calm gladness of a full eternity. —F. W. Faber.

O Truth who art Eternity; And Love who art Truth; And Eternity who art Love; Thou art my God, to Thee do

Fishing Opens, Friday 15th

We have a better assortment of tackle than ever before. Prices are lower this year on many lines of tackle. We have bought right and have passed on this reduction to the public

A prominent newspaper owner told Premier Bennett that newspapers gave more time and money in public service than any other form of business, in reply to a criticism of newspapers and postal rates. A local paper is an asset which too few realize the value of as an asset in community life, or they would be more liberal in advertising support.

In the advertisement in this news paper, reliable merchants and manufacturers offer you their finest values. Before going to the stores to buy, shop here first. Compare products until you've found just what you want. Compare prices until you've pleased your purse. You'll save endless hours of weary walking. And you'll buy with the comforting assurance that every dollar has done its duty.

Tilbury, Ont. — With race drivers from all parts of Europe entered Fred Bravard in a 1933 Terraplane 8 Convertible won the 6000-kilometer Morocco Rally, according to word received by Hudson-Exess of Canada Limited. Twelve cars finished the long grind which started at Rome, ended at Casablanca.

Personal and Local

Miss May Powell spent the week end in Calgary.

Born: To Mr. and Mrs. D. Fife filio on June 9, a son.

Mrs. Morency and daughter, of Coalhurst, were the guests of Mr. and Mrs. J. Brennan on Sunday.

Mr. and Mrs. A. L. Watkins of Edmonton are visiting the latter's parents, Mr. and Mrs. J. Ford

Fred Antrobus spent the week end at Banff, also Mr. and Mrs. W. Oliver of Blairmore.

Mr. and Mrs. D. W. Hulburt of Calgary have taken up residence for the summer at "Kum agen" cottage at the lake

To many say this should be done and that should be done, but what really counts is getting out and doing it. Be a doer!

Merchants requiring calendars or advertising novelties may obtain same through The Journal, agent for the Dominion Calendar Co.

Coleman football team will play at Fernie on Sunday. This evening the airport camp team will play here.

The Journal is taken home and read by the entire family. Advertisements in its columns are given as close reading as the news

R. F. Barnes represented Coleman and the Crows Nest Pass Golf and Country Club at the annual tournament at Cranbrook last week.

The Barbers Union has put into force uniform rates for work and price cards are displayed in union shops for the information of the public.

Excursion fares on the railways are inducing many to turn to the comforts and conveniences of rail way travel during the hot summer months.

Adding machine rolls, carbon paper and counter check books at The Journal. Dealers for Remington Portable Typewriters. Telephone 209.

McBurney's drug store has a wonderful value in Woodbury's famous facial soap, regular value 25c selling this week at 10c per cake.

The annual meeting of Hillcrest Rod & Gun Club was held last Friday evening. For several years there has been a very enthusiastic club at that town.

Mr. and Mrs. Walter Frederick son spent the week end at Claresholm, and were accompanied on their return by Mrs. John Wallis, for a visit here

Mr. and Mrs. A. Beveridge and Betty and Mrs. W. Milley and Billy spent the week end the guests of Mr. and Mrs. Duncan at the Michel hotel.

A dance is to be held in Michel community hall on Sat. June 16, under the auspices of the baseball club, and a \$10 hamper is to be given to the holder of the lucky ticket. The Musical Aces Orchestra will play, and admission is 25c

Churches always notice a falling off in attendance at services during the fine summer months. Will Rogers says it is not a lack of religious inclination, but just that you can't beat Sunday morning to get the old car out and ramble. A preacher can have the best sermon in the world, but he just has to deliver it to folks without any gas. Rainy days and when they are fixing the roads are the only times you can get them. Folks are just as good as they ever were, and mean well, but no minister can move 'em like a second hand car.

Tennis Club Notes

The Coleman Tennis club started preparations this week for holding their second annual tournament on the local courts on July 1-2.

Invitations have been sent out to tennis clubs throughout Southern Alberta and also to clubs as far west as Kimberley. Lethbridge have already promised several entries to help put the tournament over big

Coleman players made a clean sweep last year by winning all five events in the face of stiff outside opposition and are now practicing strenuously to duplicate this feat this year against even greater opposition.

Football League

Results of games played over the week end were:

Coleman 2 Michel 2
Hillcrest 2 Fernie 1
Bellevue 0 Kimberley 2
Corbin 4 Blairmore 0

Crows Nest Pass league standings.

	P	W	L	D
Kimberley	7	5	1	0
Corbin	7	5	2	0
Coleman	7	4	2	1
Coal Creek	7	4	3	0
Fernie	7	3	3	1
Michel	7	2	3	2
Bellevue	7	2	4	1
Blairmore	7	1	5	0
Hillcrest	6	1	5	0

Local News

Two many who are able to buy a tag at the football games indulge in what is known as "crashing the gate." Ticket sellers state that there are some who though regularly attending, look the other way or give a stony stare as they approach. If all were to sponge this way, where would the team get its expenses?

The Girl Guides held a tea at Mrs. J. A. McLeod's on Wednesday, and about \$18 was received towards the camp expenses at McBain's Lake, where the girls will go early in July.

Four double deck cattle cars containing about 750 head of sheep from Lethbridge district were unloaded at Sentinel on Saturday for the annual summer grazing in the vicinity of Crows Nest mountain.

Tilbury, Ont. June 6—"To day we doubled the number of cars shipped during the entire year 1933," announced Ross Mackinnon general sales manager of Hudson-Exess of Canada Limited, as workers left the plant at closing time to-night.

The Boy Scout Association of Blairmore announced a meeting to be held in the Greenhill hotel last week for parents and others interested in the Scout movement. The chairman and secretary were the only two present. It indicates a lack of interest in a worth-while movement which is a reflection on the town, and does not encourage workers to proceed with plans for the boy's summer activities.

Joe Baksj, 14 years, son of Austrian parents resident here, died in Coleman hospital from a ruptured appendix on June 7. His father owns a small shoe repair shop on Main street. The deceased attended public school. The funeral was held on Saturday and the flag at Central school was placed at half mast, he having been in Grade VIII. Rev. Fr. Dunbar conducted the funeral service, and burial took place in the Catholic cemetery.

That which brings peace of mind is faith in oneself, which can only be obtained by faith in Divine power. Every man made system

which is based on a material viewpoint alone does not endure. Faith endures and enables men and women to accomplish things which may appear well nigh impossible. Too many people are ready to turn to things they know very little of while ignoring the basic principles of the golden rule.

The Journal is taken into the homes and read by the entire family. For that reason alone it is the most efficient advertising medium, because people demand it. Again, bold face type and printers ink make a far more forceful appeal and create a better impression than any other form of advertising, and when published in a NEWSPAPER give much more effective value than handbills thrown indiscriminately over the garden gate. Discriminating advertisers use The Journal every time.

500 sheets White Bond Typewriter Paper, size 8 1/2 x 11, in cardboard box, for \$1.30 at The Journal office. Useful for manuscript purposes or for writing personal letters.

Buy typewriter ribbons and copying paper at The Journal office. Blank counter check books or printed to your order, may also be obtained.

Support our advertisers. They deserve your business—they sell dependable merchandise.
